X' STRING

Cross channels are not symmetrical
LEFT SIDE have 8 small string holes
RIGHT SIDE have 9 small string holes
Start X's at 5H LEFT SIDE

TIE OFF

M's at 9H LEFT SIDE and RIGHT SIDE as suitable on the racquet
X's at 6H LEFT SIDE and 2T LEFT SIDE as suitable on the racquet

Notes:

Prince's requires X's to be installed top of the botton on all racquets. Beware botton to top installed of X's will void the warrantly.

In order to make it easier to feed cross strings through channels previously covered by main strings, it is recommended to place a piece of scrap string across the string groove prior to pulling tension on the main string. This string can then be used to pull the main string to the side when installing the cross string, and then removed from the racquet.

CAUTION:

MORE PERFORMANCE racquet design are unique because they do not need plastics grommets to protect the strings. It is not recommended to use sharp object such as awls during stringing because of the potential to scratch or damage the racquet frame
